

I International Symposium on Nursing and School Health & V Congreso Nacional de Enfermería y Salud Escolar

PRESENTATION

The **I International Symposium on Nursing and School Health**, has as an objective to become a meeting point for all those school nurses, health professionals and health associations who work and promote school health, universities offering school nursing degrees and programmes, other professionals working at educational centres and those who might find this event interesting.

We want to get familiar with each country's experience regarding school nursing. We want to know about the way they work, how they are organized, how do they face health emergencies, how is health education and health promotion approached in schools, without forgetting the crucial work and rapport between the professionals involved.

This Symposium is hosted by the **International Association of School Nurses & Health Promotion (ISNA)** and the **Spanish Scientific Association of Nursing and School health (ACEESE- Asociación Científica Española de Enfermería y Salud Escolar)**. It's held along the **V National Congress on Nursing and School Health** to know, interact and reflect on school nurses' health promoting and caring roles. Likewise, to establish lines of collaboration and work between all school nurses in the world; to discuss and agree on proposals that help improving students' health in school, as well as the impact of health promotion in the communities where the schools are located.

This Symposium will be the ideal place to share knowledge, experiences and scientific evidence of our work as school nurses. We seek to know the results obtained from nurses around the world, discuss and agree on the creation of a working network between professionals at an international level to make information, documents and guidelines available in every country, making possible for all school nurses to offer quality assistance to the entire educational community.

We would like you to attend and participate presenting a poster, oral presentation or as a speaker in one of the debate tables during this Symposium.

March 23, 24 and 25, 2022

Programme schedule

15 h – 20 h (CET)

I International Symposium on Nursing and School Health & V Congreso Nacional de Enfermería y Salud Escolar

MAIN TOPICS AND DEBATE TABLES

BLOCK 1: School nurses' competence role.

In this block, oral presentations and posters have as an objective to show the different roles that nurses have in schools around the world.

BLOCK 2: Children and adolescents with special needs.

This block includes how school nurses organize their tasks in schools with children who need daily healthcare or special care related to a disability or other pathologies, as well as the specific guidelines to be followed.

BLOCK 3: Health education and promotion.

To get familiar with different health promotion programmes and those micro-programmes carried in schools:

- Educational proposals in schools.
- Take care of students' health needs through health education.
- School for parents.
- Risks and illnesses prevention at school.
- Health promotion teaching methodologies.
- New technologies applied to health education.
- Diverse proposals and ideas.

BLOCK 4: School research.

To learn about research works related to healthcare at school, as well as publications in this regard. Proposals for research projects that have been or are being carried out in any country.

Publication of Doctoral and Master's theses.

We include in this section the work and experiences by different associations that work on nursing and school health.

I International Symposium on Nursing and School Health & V Congreso Nacional de Enfermería y Salud Escolar

MAIN TOPICS AND DEBATE TABLES

BLOCK 5: Students' health records.

To identify the link between school nurses and other health professionals; to know the guidelines they follow, jargon, assessments and nursing diagnoses that they carry out to keep a record of healthcare and health promotion in schools around the world.

* Proposals for health records are accepted.

BLOCK 6: School nurses training.

This block focuses on sharing information about the different training courses and special programmes in healthcare for children and adolescents in schools. Besides, knowing the specific requirements and educational needs nurses look for and are interested in, in order to keep expanding their knowledge and preparation in health education.

BLOCK 7: Healthcare during pandemic times.

To present guidelines, action plans or health interventions that have been or are being carried out in schools due to the pandemic situation.

BLOCK 8: Miscellaneous.

Any topic related to children and adolescents' physical, emotional and mental health, that haven't been covered in other blocks.
